

# INT

In-band Network Telemetry

## EXport Data

Each node exports metadata  
based on Watchlist config.

(aka *postcards*)

### INT-XD

No packet modifications

## EMbed Instruct(X)ions

Embed only Instructions in the pkt.  
Each node exports metadata.

(aka IOAM *Immediate Export*)

### INT-MX

Limited packet modifications  
(Instructions only)

## EMbed Data

Embed instructions and metadata,  
export at the sink node.

(classic INT)

### INT-MD

Packet modifications  
(Instructions & Metadata)
